Investment in personal development:

- 1090 Euro for southern countries
- 1190 Euro for northern countries

Part 1: E-learning on the ASTRAcademy online platform

Trainees will enrol on the e-learning platform on the ASTRAcademy website. Alternatively, trainees can also register by sending an e-mail to info@astracademy.net .

After successful registration, trainees will receive a user name and password, allowing them to log in on the ASTRAcademy e-learning platform.

Additionally, trainees receive a link where they can download all background documentation relating to the course. Trainees are expected to study the relevant background documentation before they take the individual online modules.

The online training program consists of various courses, including modules and quizzes. The individual modules consist of a presentation with voice recording, which covers all FSC requirements relating to chain of custody, controlled wood, the and other FSC normative requirements. The course has been updated recently to include the **FSC Regulatory Module/EUDR**.

Part 2: Face-to-face course

The face to face course (20 hours- 2.5 days) is aimed at developing skills relating to auditing against FSC standards, using the knowledge acquired through the online course. The face-to-face course includes the following elements:

1. Group discussions about the content of the FSC normative framework and guidelines as presented in the online course. Clarification of concepts and standard elements (whenever required by the group, 15 minutes at the beginning of each exercise).
2. Group discussions, exercises, case studies, and role plays:
   - FSC & ISO standards; The core values of the FSC system, independence and conflict of interest
   - Introductory exercise to FSC, forest management and chain of custody certification.
   - Product groups
   - Transfer, percentage & credit system
   - Multi site chain of custody
   - Sampling for multi–site CoC
   - Controlled wood
   - Outsourcing
   - Critical control points
   - Non-conformities and corrective action requests
   - Core Labour Requirements (CLR)
   - Complementary requirements
   - The role of auditors in verifying the correct use of the FSC Trademarks by certificate holders.
3. Course evaluation. The face to face course will end with a test. The overall evaluation of each trainee will take into account:
   - The result of the online course
   - The result of the final test at the end of the face-to-face course
   - Active & meaningful participation in the f-2-f course
